PROFILE

Full Stack Software Developer with 2+ years of professional and freelance experience building responsive, high-performance web and mobile applications end-to-end — from React.js and Next.js to Node.js/Express and FastAPI backends with MongoDB and PostgreSQL. Proven track record delivering pixel-perfect UIs from Figma designs, building and securing RESTful APIs with JWT authentication, and integrating payment gateways and third-party services. Experienced working with remote, cross-functional Agile teams and clients, with strong skills in code reviews, unit/integration testing, and clear technical communication. Comfortable owning features end-to-end, from database schema and API design through to a polished, accessible UI. Passionate about writing clean, maintainable code and shipping digital products that improve user experience for businesses and clients worldwide, including on freelance platforms such as Upwork.

AREAS OF EXPERTISE

- React.js (Hooks & Functional Components) and Next.js (SSR/SSG) Development
- React Native Cross-Platform Mobile App Development
- JavaScript (ES6+) and TypeScript
- HTML5, CSS3, and TailwindCSS / Material UI Styling
- Responsive, Mobile-First, and Cross-Browser Compatible Design
- State Management: Redux Toolkit, Zustand, Context API, RTK Query
- Node.js & Express.js Backend Development
- Databases: MongoDB & PostgreSQL
- REST API, GraphQL & JWT-Secured API Design
- Web Accessibility (Semantic HTML, ARIA, Keyboard Navigation)
- Unit & Integration Testing (Jest, React Testing Library, Vitest)
- Git, GitHub, and Version Control
- CI/CD (GitHub Actions, Automated Build & Deployment Pipelines)
- AWS (Cloud Deployment, Application Hosting & Infrastructure)
- Performance Optimization & Reusable Component Architecture
- Agile/Scrum Remote Collaboration & Client Communication
- Freelance & Full Stack Project Delivery (Node.js, Express, Mongoose, Paystack)

WORK HISTORY

Full Stack Engineer | *Toac Technologies* · Contract, Remote 06/2025 – Present

- Build and maintain TOAC, a telehealth platform connecting patients with medical counsellors for online therapy sessions, working across a React 19 / Next.js / TypeScript / TailwindCSS frontend and a Python FastAPI backend.
- Design and implement REST endpoints in FastAPI with Pydantic request and response models, giving the frontend a typed, self-documenting contract via the auto-generated OpenAPI schema.
- Implement end-to-end authentication, including JWT issuance and refresh on the backend and email OTP verification flows on the client, securing protected routes and role-scoped API access.
- Deliver role-based dashboards for patients, doctors, and admins, enforcing permissions on both the API layer and the UI so each user type sees only what their role allows.
- Build the session booking flow end-to-end, covering availability and scheduling logic on the server through to real-time slot selection, in-app messaging, and automated notifications in the interface.
- Model and query the application database behind FastAPI, shaping schemas and queries around booking, messaging, and user management workloads.
- Architect reusable, typed React components and shared TypeScript types across the stack, keeping the codebase consistent as new features ship.
- Own features from database schema and API design through to the deployed UI, collaborating with the team on API

contracts and code reviews.

Backend Engineer | *Zeta Technologies · Contract, Remote* **06/2025 – 09/2025**

- Built and maintained RESTful APIs using Node.js and Express, powering core backend services for a production application.
- Designed PostgreSQL database schemas and queries, ensuring efficient, reliable data storage and retrieval across core features.
- Implemented JWT-based authentication and authorization, securing API endpoints and protecting user data across the platform.
- Integrated a third-party payment gateway to handle transaction processing, ensuring secure and reliable payment workflows.
- Collaborated with frontend engineers to define and document REST API contracts, ensuring smooth integration between backend and client applications.

Frontend Engineer | *Upsywave Tech Company Ltd · Remote* **03/2024 – 04/2025**

- Delivered responsive, production-grade frontend interfaces for 6 web applications using React.js, Next.js, and TailwindCSS, contributing to a shared component library adopted across 4 projects.
- Optimized client-side data fetching by eliminating redundant API calls, achieving a 30% reduction in network overhead and improving perceived load performance for end users.
- Collaborated cross-functionally with product, design, and backend engineers in a remote Agile workflow, participating in code reviews and pairing on complex feature work.
- Built reusable, well-documented React components, reducing implementation time for new features and improving consistency across multiple concurrent projects.
- Implemented responsive, mobile-first layouts and resolved cross-browser compatibility issues, ensuring a consistent user experience across Chrome, Safari, and Firefox.
- Communicated directly with clients and stakeholders to gather requirements and deliver iterative updates, supporting on-time project delivery in a remote-first, client-facing work culture.

EDUCATION

Advanced Diploma, Software Engineering — Aptech · Distinction · 2026

B.Sc., Public Health Science — University of Calabar · Second Class Upper (2:1) · 2023

CERTIFICATIONS

- **Understanding TypeScript** — Udemy, 2026
- **React Native 2026: The Complete Modern Course** — Udemy, 2026
- **The Ultimate React Course: React, Next.js, Redux & More** — Udemy, 2025
- The Complete Full Stack Web Development Bootcamp – Udemy - 2025
- Backend REST API with [Node.js](#) - Udemy - 2025

PROJECTS

Tasteatfoods | Frontend Developer | *Next.js · TypeScript · TailwindCSS*

tasteatfoods.com

- Built a full-featured Next.js e-commerce platform with product catalog, cart, checkout, and payment integration, supporting 50+ products across 6 categories.
- Implemented secure checkout and order management, handling 200+ test orders with a 98% checkout success rate.

Blingg | Frontend Developer | *React · TailwindCSS*

blinggapp.com

- Designed and built a high-performance product discovery interface with mobile-first responsive layouts, reducing bounce rate by 25%.
- Engineered a reusable TailwindCSS component library, enabling 40% faster feature iteration and a consistent design system across the app.

E-bringgs | Frontend Developer | *React · TypeScript · Monorepo*

ebringgs.com

- Architected a 3-app pnpm monorepo (student/client portal, teacher portal, admin portal) deployed across three subdomains,

sharing 6 internal packages, cutting duplicated code by 60%, and reducing per-portal bundle size by 45% on average.

- Integrated 60+ REST API endpoints on a Mongoose/Express backend, covering authentication and role-based authorization.
- Integrated Paystack for NGN instalment payments with idempotent webhooks, an admin payment-plan editor, and automatic access suspension on missed instalments.

ACHIEVEMENTS & LEADERSHIP

President | *National Association of Public Health Students* **03/2021 – 12/2023**

- Led the national executive body, representing public health students across member institutions nationwide.
- Coordinated professional development events and community health initiatives at a national level.

Tech Lead | *Student Union Government, Aptech* **02/2025 – 01/2026**

- Directed technology initiatives for the student union, managing digital tools and communications platforms.
- Mentored fellow students in software development, supporting technical skill growth across the student body.
