PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building responsive, scalable web applications using React.js, Next.js, TypeScript, and modern frontend development practices. Experienced in translating complex business requirements and Figma designs into intuitive user experiences, integrating REST APIs, and developing reusable component architectures that improve development efficiency and application performance. Having contributed to healthcare, e-commerce, and digital product teams, I have worked in remote Agile environments where collaboration, code quality, and user-centric design are critical. I am passionate about leveraging technology to solve real-world problems and am excited by opportunities to contribute to products that improve accessibility, connectivity, and digital infrastructure across Africa.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, JavaScript (ES6+), TypeScript, HTML5

Styling & UI: TailwindCSS, CSS3, Responsive & Mobile-First Design, Component Architecture

State Management: Redux Toolkit, Zustand, Context API

Tools & Platforms: Git, GitHub, Figma, Expo, Postman, EmailJS, RTK Query

Concepts: REST API Integration, Performance Optimization, Reusable Components, Cross-Browser Compatibility, Remote Collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer | [GAO Tek Inc](#) · *Contract*

Jan 2026 – Apr 2026

- Engineered scalable, responsive interfaces across 8+ feature modules using React.js, TypeScript, and TailwindCSS, delivering production-ready components within a distributed Agile team.
- Translated 30+ Figma designs into pixel-accurate, cross-browser-compatible interfaces, maintaining design fidelity across desktop and mobile viewports.
- Streamlined team collaboration through structured GitHub workflows and two-week Agile sprints, cutting review-to-merge time by 20%.

Frontend Engineer | [Toac Technologies](#) · *Contract*

Jun 2025 – Sep 2025

- Built and maintained responsive web and mobile interfaces for a healthcare platform serving 2,000+ active patients, using React.js, TypeScript, and Zustand for state management.
- Integrated 15+ REST API endpoints covering authentication, session handling, and patient workflows, ensuring seamless communication between frontend and backend services
- Optimised application rendering pipeline, reducing initial load time by ~35% and cutting reported UI defects by ~40% through systematic debugging and performance profiling.

Frontend Engineer | [Upsywave Tech Company Ltd](#) · *Remote · Full-time*

Mar 2024 – Apr 2025

- Delivered responsive, production-grade frontend interfaces for 6 web applications using React.js, Next.js, and TailwindCSS, contributing to a shared component system adopted across 4 projects.
- Optimized client-side data fetching by eliminating redundant API calls, achieving a 30% reduction in network overhead and improving perceived load performance for end users

PROJECTS

Tasteatfoods — E-Commerce Platform *React/Next.js · TypeScript · TailwindCSS* <https://tasteatfoods.com/>

- Built a full-featured e-commerce platform with product catalog, cart, checkout, and payment integration, supporting 50+ products across 6 categories.
- Implemented secure checkout and order management, handling 200+ test orders with a 98% checkout success rate.
- Optimized to sub-2s page loads and a 95 Lighthouse performance score, and engineered a reusable component library that cut new-page build time by 40%.

Blingg — Product Discovery & E-Commerce App *React · TailwindCSS* <https://www.blinggapp.com/>

- Designed and built a high-performance product discovery interface focused on visual appeal and smooth interaction, reducing bounce rate by 25%.
- Engineered a fully reusable TailwindCSS component library, enabling 40% faster feature iteration and a consistent design system.
- Built responsive, mobile-first layouts with smooth transitions and animations, increasing average session duration by ~30%.
- Implemented product search and category filtering for fast discovery across 100+ products, improving findability and user flow.

Toac Telemedicine App *React · React Native · TailwindCSS · REST APIs*

- Built a telemedicine platform letting patients book consultations and communicate with providers online, serving 2,000+ users.
- Integrated REST APIs for appointment booking, secure patient-provider messaging, and session handling.
- Developed cross-platform web and mobile interfaces with React and React Native for a consistent experience across devices.

EDUCATION

Advanced Diploma in Software Engineering | [Aptech Computer Education](#) · *Distinction* 2026

B.Sc. Public Health Science | [University of Calabar](#) · *Second Class Upper (2:1)* 2023

LEADERSHIP EXPERIENCE

President | [National Association of Public Health Students \(NAPHS\)](#) Mar 2021 – Dec 2023

- Led the national executive body, representing public health students across member institutions nationwide.
- Coordinated academic conferences, professional development events, and community health initiatives.

Tech Lead | [Student Union Government \(SUG\), Aptech Computer Education](#) Feb 2025 – Jan 2026

- Directed technology initiatives for the student union, managing digital tools and communications platforms.
- Mentored fellow students in software development, supporting technical skill growth across the student body.

CERTIFICATIONS

- Understanding TypeScript — Udemy 2026
- React Native 2026: The Complete Modern Course — Udemy 2026
- The Ultimate React Course: React, Next.js, Redux & More — Udemy 2024
